Chess
Drawing
Machine Learning
Video Games

ABOUT ME

Passionate about developement and problem solving, driven by a desire to build innovative solutions.. Looking forward to work in competitive environments and eager to make a positive impact while working as a team player.

PROJECTS

TextBin

Textbin is a online platform that allows users to store and share text-based content. It provides a simple and convenient way to share text-based information.
Developed using Javascript (ejs), Express, Node.js and integrated MongoDB to store texts.

Online Voting System

Developed with PHP, an online voting system facilitates secure and efficient voting processes. It includes features like user authentication and ensures the integrity of votes. Users can conveniently participate and administrators can manage the system effectively. MySQL database is used to store user information and voting counts.

Movie Website

A movie website created using the TMDB API, showcasing movie information, ratings, overviews. Users can search for movies, view popular releases, upcoming movies, top rated movies and creating an immersive movie browsing experience.
